

Trading System Description

Algorithm Name:

Author:

Date:

Action		Description (by Algorithm)	Description (in words)
Preparation (What should be done before entering position)			
Enter Position (which conditions should exist in order to enter position, how should these conditions be calculated)	Long		
	Short		

Closing open positions: (Conditions for closing open positions, how should positions be closed)	Long	With Profit Target		
		With Loss		
		Other signals (i.e. trailing stop)		
	Short	With Profit Target		
		With Loss		
		Other signals (i.e. trailing stop)		

Action	Description (by Algorithm)	Description (in words)
After Position is Closed What should be done		
Additional Signals (all other signal for entering and closing position)		

Parameter Name	Description	Default Values

General description of strategy:

Numerical Example of strategy:
